MANJU MAJHI: DARKNESS TO LIGHT

YOUTUBE : https://www.youtube.com/watch?v=3wK6U8KyjZ0

Manju Majhi lives within 50 kilometers of Lokeswarananda Eye Foundation. In the harsh realities of life, she had become a burden on her family. She prayed to God twice a day to free her from the bonds of this worldly life. We didn't do much. We just facilitated her cataract surgery with the help of someone like you. A small intervention – it changed her life.

Manju's story, however, is not unique, there are other Manjus just around our homes, all are waiting for this little help and compassion to make a large difference in their lives. If you are feeling their pain and hearing their call, please join us in our prayers to serve them.

The Lokeswarananda Eye Foundation (LEF) is a super specialty eye hospital equipped with most modern facilities, operation theaters and highly reputed doctors and staff dedicated to providing essential eye surgeries and services to those in need.

In 2023-24 we have organized more than 500 rural camps to examine around 400,000 patients leading to 12000 free cataract surgeries. We are aiming to conduct approximately 15,000 plus surgeries during the 2024-25.

Our approach involves a comprehensive four-step process, beginning with preliminary screening camps in far flung villages to identify patients requiring surgery. Following diagnosis, patients are transported from their villages to the designated hospital or camp for pre-operative treatments, ensuring they are well-prepared for the surgery. The subsequent stages encompass the surgical procedure itself and post-operative follow-up care. Besides the to and from transportation, the remoteness and distance often require to accommodate the patients for an extra couple of days before and after surgeries to ensure their safety. All these steps requiring extra cost above and beyond just medical expenses.

In our 2024-25 projection, we estimate surgeries of 15000 to 20000 patients and an all-inclusive cost of $30 per patient.

We earnestly appeal for your generous support to help us achieve our mission of restoring vision and improving lives through these essential eye surgeries by bearing a considerable part of these expenses.
